BRUSHLESS Technology

The brushless motors from LOGICDATA are the most reliable and quietest on the market and enable soft transitions between sitting and standing position. The impressive responsiveness and effeciency inspires as well as the low wear. The brushless technology guarantees also a load-independent performance - the table moves smoothly no matter how heavy the load is.

- Less wear of the components
- Increased life time
- Load independent performance
- Low noise level
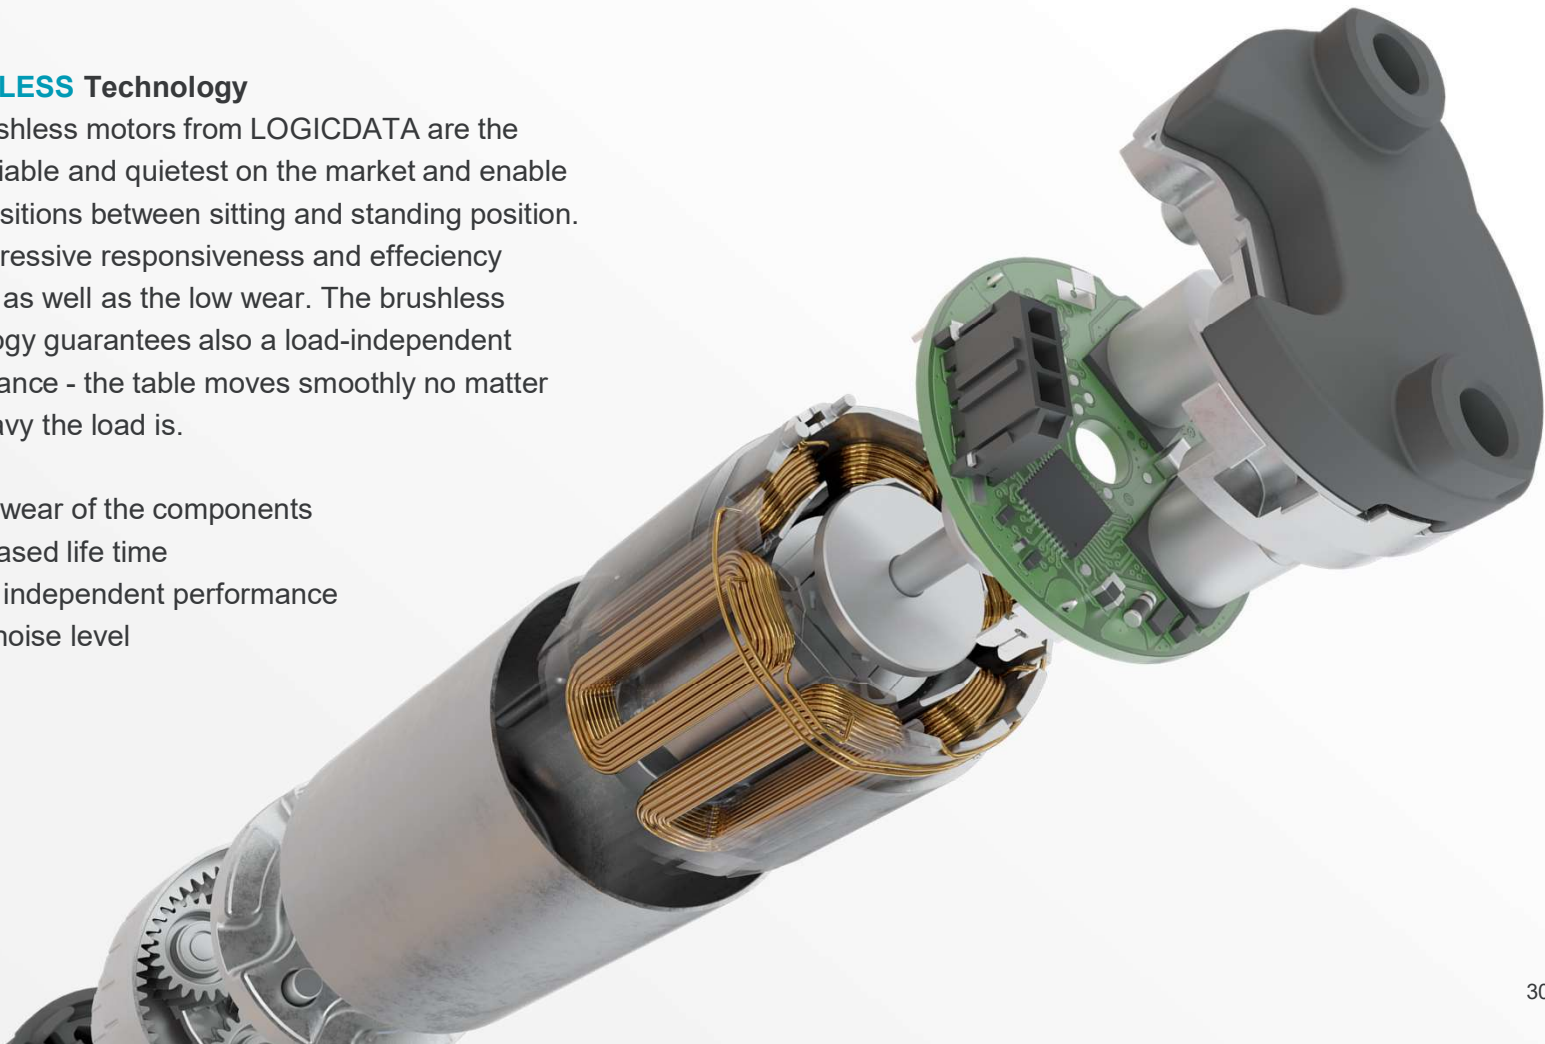

2 Sensors because we care about safety!

The **FLEXI** table frame is using LOGICDATA's Intelligent System Protection (ISP), a cutting-edge technology when it comes to anti-collision detection. The integrated sensor in every table leg is a perfect solution that minimizes the risk of costly collisions between your height-adjustable table and its surroundings. No need for extra parts, no need for complex assembly procedures.

- 2 integrated sensors per table system
- Patented technology
- Load independent performance
- Ready for IEC 60335-2-116
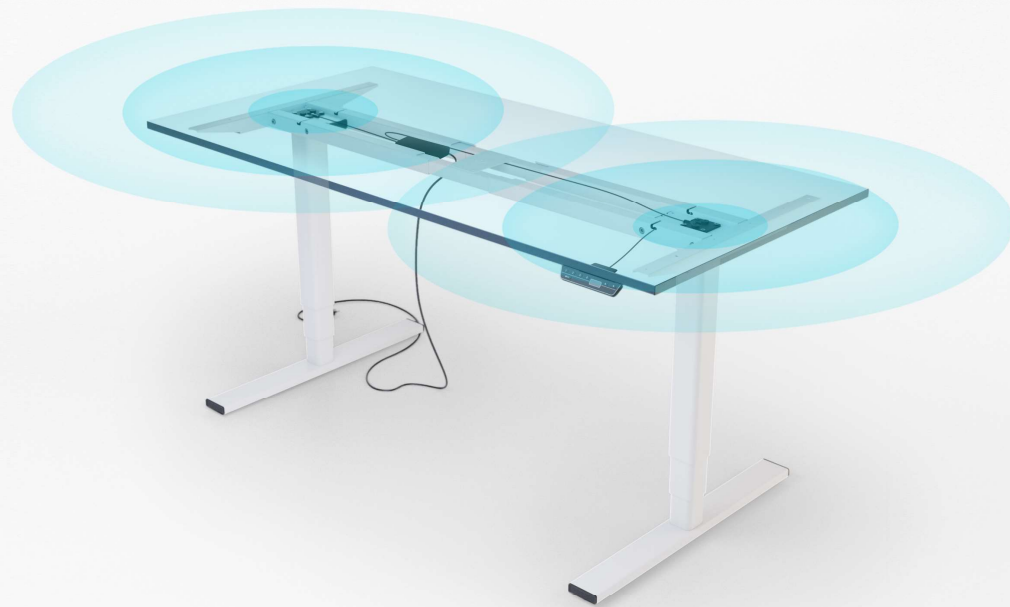

Unique Design

The **FLEXI** table frame stands out with its reduced and unique design from the multitude of products on the market emerged. Especially the leg design with its soft edges makes the **FLEXI** an unique and stand out of the crowd product.

- Modern & slim design
- Packaging optimzed for online shipping
- Unique column shape as differentiation
